RiskSAFE AUSTRALIA

SAFETY · RISK · RESILIENCE

VETERAN OWNED & OPERATED

Practical risk, safety and resilience for a stronger Australia.

DEFENCE · COMMUNITY · OPPORTUNITY

RiskSAFE Australia is a Sydney/NSW-based, veteran-owned partner helping organisations identify risk early, strengthen controls and build systems that support safer, more resilient operations. We bring enterprise-level risk and safety expertise, scaled for small business and events.

WHO WE ARE

- Supporting organisations across Australia from our NSW base.
- Specialists in risk management, WHS, assurance, emergency management and resilience.
- Tailored for businesses of every size, with a strong focus on veteran-owned and emerging enterprises.
- Practical, responsive advice that protects people, assets and continuity.

EXPERIENCE THAT COUNTS

Our team brings more than two decades of risk and safety experience across defence, government, education, aviation and corporate environments, from risk governance and safety assurance to crisis management and psychosocial risk.

20+
years of experience

200+
organisations supported

WHY CLIENTS CHOOSE RISKSAFE

Protect people
Identify hazards early and strengthen the controls that matter.

Improve performance
Cut avoidable disruption, incidents and cost with better systems.

Build resilience
Practical arrangements to prepare, respond and recover.

Make compliance usable
Turn WHS, assurance and governance duties into clear actions.

Services that turn risk into action.

Integrated support across risk, WHS, safety assurance, emergency management and organisational resilience, delivered as a defined project, a targeted assessment or an ongoing partnership.

Risk Assessments
Identify, evaluate and prioritise risks to reduce exposure.

WHS Management
Systems, governance and practical controls for safer work.

Safety Management
Procedures and assurance that promote proactive safety.

Safety Audits
Independent review with clear recommendations.

Safe Work Procedures
Clear procedures for consistent, safe work practices.

Emergency Management
Plans for preparedness, response and recovery.

Business Continuity
Keep critical operations running through disruption.

Psychosocial Risk
Assess hazards and support psychologically safe work.

Quality Management
Better processes for quality, efficiency and outcomes.

Risk Management
Frameworks that build risk into everyday decisions.

Safety Officers
Embedded professionals giving practical assurance.

Resilience & Assurance
Integrated pathways that strengthen readiness.

PSYCHOSOCIAL RISK

A WHS issue, and a business issue.

Identify hazards, assess risk, implement controls, consult workers, then monitor and review: a governance responsibility, not only an HR one.

EVENTSAFE

Practical risk, WHS and emergency planning for small-to-medium events, with a niche in veteran, commemorative, defence-industry, sporting and charity events.

SECTORS WE SUPPORT

- Construction
- Manufacturing
- Government
- Education
- Health & Aged Care
- Transport & Logistics
- Defence & Critical Infrastructure
- Small Business & Veteran Enterprises
- Events & Community

ENGAGEMENT PATHWAYS THAT SCALE WITH YOU

RiskSAFE START
Targeted risk and WHS support with clear next steps.

RiskSAFE GROW
Broader system, governance and capability building.

RiskSAFE ASSURE
Structured audit and ongoing improvement.

EventSAFE
Event-specific risk, WHS and emergency support.

Tender & Supply Chain
Readiness for tender and supply-chain requirements.

Annual Partner
Ongoing access to expertise and regular review.

DIGITAL TOOL · WHS INCIDENT HUB

Incident reporting your team will actually use.

The WHS Incident Hub is our hazard, incident and compliance app, built from field experience. Workers report from any phone in about a minute. The Hub recognises a likely notifiable incident while it is being reported, tells your team exactly what the regulator requires, and prepares a submission-ready notice PDF in seconds.

THE PROBLEM IT SOLVES

Paper forms don't follow people across sites, shifts and events. Incidents are written up late, photos get lost, and most small businesses have no safety officer to judge what must go to the regulator.

AUTOMATIC NOTIFIABLE INCIDENT ALERTS

1
Detects
Checks each report against the thresholds for that state or territory.

2
Directs
Shows the regulator's number, site-preservation duty and deadlines.

3
Drafts
Prepares the written notice PDF for the right regulator.

Covers every Australian state and territory and Comcare, including Victoria's OHS Act differences.

EVERYTHING YOUR TEAM NEEDS, IN ONE APP

Report in a minute
Photos, GPS location and weather.

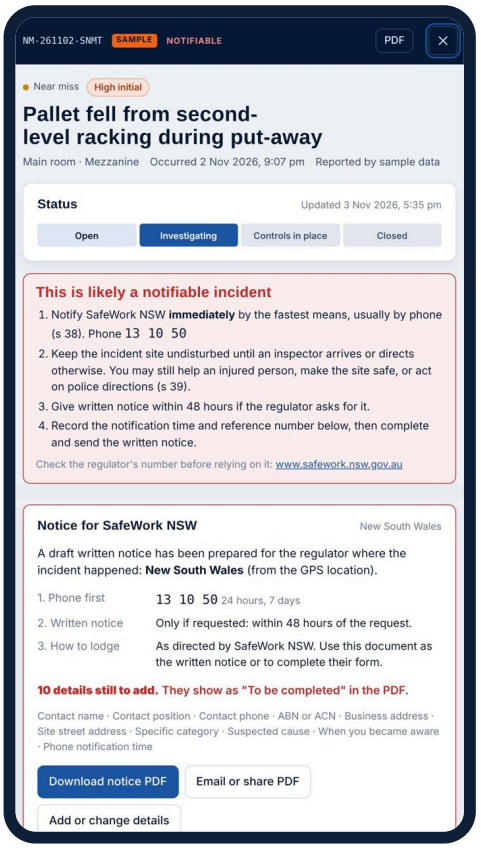

Register & actions
Risk ratings, investigations, reminders.

Forms & sign-off
Inspections, SWMS and toolbox talks.

Hazard library
356 hazards in 20 groups, 5×5 ratings.

Dashboards & exports
Audit trail, PDF and CSV for boards.

Works anywhere, securely
Offline-ready, role-based access.

A near miss flagged as a likely dangerous incident, with the regulator's steps and a notice PDF ready. Sample data.

BUILT AROUND THE WHS ACT: EVERY FEATURE MAPS TO A DUTY

Your duty	Reference	Your duty	Reference
Identify notifiable incidents	WHS Act ss 35–37	Preserve incident sites	WHS Act s 39
Notify the regulator immediately	WHS Act s 38	Keep records for at least 5 years	WHS Act s 38(7)
Review failed controls	WHS Regs r 38	Reports can't be deleted; every change is time-stamped.	

See it in two minutes

Try the free demo with sample data: no sign-up, nothing saved. We then set up your workspace, add your team and train your crew.

risksafeaustralia.com.au/whs-incident-hub

The notifiable incident check supports, and does not replace, the PCBU's judgement and duty to notify the regulator.

CROWDED PLACES ASSESSMENT

Venue Risk and Resilience Check

A structured assessment of a venue's exposure to deliberate attack on crowded places, and of the controls already in place. It gives venue operators and event organisers a clear, defensible picture of risk so they can plan and prioritise treatment.

Up to 185 questions across 11 domains, drawing on publicly available crowded places guidance from the Australia-New Zealand Counter-Terrorism Committee (ANZCTC). Every score shows its inputs, so a reviewer can recompute the result.

WHAT THE REPORT GIVES YOU

Threat score
From national threat level, incident history, prominence and nearby high-risk assets.

Inherent & residual risk
Plotted on a 5×5 matrix, before and after current controls.

Resilience profile
Scores for seven capabilities, from planning to recovery.

Action register
Critical, recommended and best-practice actions with owners.

RESILIENCE ACROSS THE ATTACK CYCLE

Pre-attack	Planning · Deterrence · Detection · Prevention
Attack	Protection · Response
Post-attack	Recovery

DOMAINS ASSESSED

Basic risk layout · Plans, policies & procedures · Physical · Access control · Perimeter · Hostile vehicle mitigation · CCTV · IED blast mitigation · Hostile reconnaissance detection · Information · Personnel

HOW IT WORKS

1 · Profile the site
Site type, peak occupancy, significance and location.

2 · Answer by domain
Questions not relevant to the site profile are skipped.

3 · Score and rate
Threat, risk and resilience calculated transparently.

4 · Act and review
A prioritised action register the site tracks to completion.

Results are indicative and based on the information provided; review at least every 12 months, after significant change, or when the national threat level changes. Reports are risk-sensitive and for need-to-know distribution. Not endorsed by the ANZCTC or any government agency.

Let's build safer, stronger, more resilient organisations.

Talk to us about an assessment, the WHS Incident Hub, a Venue Risk and Resilience Check, or an ongoing partnership.
